

Connect America Smartwatch

The Smart Way to Stay Active and Independent

In a world of constantly evolving technology, the Connect America Smartwatch is the modern-day alternative to traditional medical alert systems. Leveraging state-of-the-art technology, it was designed to support healthy and active lifestyles while still providing fast and easy access to help at the press of a button.

The Connect America Smartwatch features a bright touchscreen that displays the time in a large, stacked format — making it easy to read. It also shows the day, date and battery information. Automated voice prompts provide confirmation when the help button is pressed and alerts users when it's time to recharge the battery. Embedded GPS and Wi-Fi locations technology enables us to send help wherever the user is located. It's offered with a light-weight, hypoallergenic silicon watchband that's gentle on the skin. Cleaning is as easy as a quick wipe with a damp cloth.

How it Works

Summon help.

You're always connected to our North America-based response center— 24/7/365 days of the year. Simply press and hold the help button for 3 seconds.

Hear a reassuring voice.

A trained care specialist will quickly assess your situation and decide upon the proper action.

Know help is on the way.

Based upon your needs and preference, Connect America may contact a family member, neighbor, caregiver or emergency services. We'll also follow up to confirm that you received the help you needed.

The Connect America Smartwatch empowers users to live their best lives while staying safe and connected.

Connect America Smartwatch

Features & Benefits

- Built-in microphone and speaker** allows users to speak directly to a trained care specialist when assistance is needed.
- GPS and Wi-Fi location technology** enables us to send assistance to the users location.
- Automated voice prompts** provide confirmation when the help button is pressed and alerts users when it's time to recharge the battery.

- 4G LTE technology** keeps users connected without the need of a cellular phone or contract.
- Advanced motion and health sensors** support mobility and step count tracking that helps users remain active and healthy.
- Heart rate monitor** offers the ability to measure heart rate anytime, day or night.
- Waterproof design** can be worn while showering or bathing.

Specifications

Touchscreen size	1.3"
Watchband length	16" (including touchscreen)
Weight	1.34 oz
Watchband material	High elastic silicon
Battery type	600mAh lithium polymer
Battery life	Up to 72 hours
Waterproof	Yes - IPX7
4G LTE Cat1 device	Yes
Sensors	Motion and vibration
GPS-enabled	A-GPS
Wi-Fi	2.4GHz
Charging method	Base magnetic charging
Smartphone pairing required	No
Time format	12-hour
Charging base	Included
USB cable & wall charger	Included
